# Delhi Township Natural Gas and Electricity Aggregation Programs Reminder and Update

In response to voter approval in 2014, governmental energy aggregation programs were established for the citizens of Delhi Township as an alternative to the energy options that are available through Duke Energy and other suppliers.

### What is Aggregation?

Aggregation is when a group of customers join together to form a single, larger customer that buys energy for its members. The citizens who are members of an aggregation program gain “buying power” to solicit the lowest price for the group’s natural gas and/or electricity needs. All eligible residents were invited to join the township’s natural gas and electricity aggregation programs in 2014 when the programs were first launched. If you were not included in the enrollment process in 2014 and are interested in becoming a member, you are encouraged to contact the suppliers to learn more about the current terms, rates and eligibility requirements. Contact information for the suppliers is provided below.

This notice also serves to notify all current members of supplier acquisitions and subsequent new names affiliated with the governmental energy aggregation programs. Please note that no changes are being made to the energy contract terms, pricing or terms and conditions of service as a result of the name changes. If you have any questions please contact the suppliers’ customer care call center numbers identified below.
